PROFILE

Recent graduate of the University of Texas at Austin (**hook 'em**) Coding Bootcamp seeking a full time position doing front-end software development. I'm passionate about design and creating engaging and aesthetically pleasing user interfaces makes me happy. I am excited about potential opportunities to come to your company to contribute to a team as I continue to learn and grow. *I am a self-motivated individual determined to accomplish everything with a positive attitude.*

APPLIED PROJECTS

LOLG2G | LEAGUE OF LEGENDS GAME2GETHER

League of Legends team builder website that matches players based on gaming-style preferences (Full-Stack Project)
- o Generated dynamic user interfaces and components that compliment LoL's trademark graphics by applying advanced HTML, CSS, and JavaScript within Bootstrap framework
- o Tools: JavaScript, JQuery, Node.js, AJAX, MySQL, Heroku
- o https://lolg2g.herokuapp.com/

LOTSPOT

Parking application that locates nearby parking garages in downtown Austin based on user destination (Front-End Project)
- o Conceptualized design and utilized HTML and CSS to construct the UI. Created interactive features with JavaScript and JQuery. Customized Google Maps UI to match theme.
- o Tools: HTML, JavaScript, JQuery
- o https://ttrangdo.github.io/lotspotFinal/

RELEVANT EXPERIENCE
